NOTICE

To Ex-Medical Officers of the Army, Navy or Public Health Service. Commissioned From Oklahoma.

For several years the undersigned, believing that some permanent recording should be made of the struggles and evolutionary epochs attaching to the medical profession of Oklahoma, accumulated, from time to time, such material as was believed to be of possible use in that connection. The sudden catastrophe of the World War called into the various Army, Navy and Public Health Services more than 500 of our profession from Oklahoma, and probably an equal number who gave their service in various capacities in assisting the State in mobilizing its man power for that struggle. Nowhere, not yet even in the offices of the Surgeons' General of the above services, does there exist any sort of compilation recording the service our profession gave the Nation, so far as is known to the writer. This and many other pressing considerations prompts the attempt to undertake such compilation with the hope that it will correctly state the record, perpetuate it as its importance demands. The work proposes to note every activity of our profession, schools, hospitals, official accomplishments, in fact every thing properly of worth and interest, it is hoped will be included eventually. To do this presupposes a task of unlimited magnitude, so, the co" operation of evefy one lessens the task to the extent of the cooperation.

It is requested that every commissioned medical officer of any of the above mentioned services mail at once his name and address to the undersigned in order that they be furnished with a blank for necessary data.

Your cooperation in this will insure success of the undertaking.

Sincerely, Dr. Claude A. Thompson. Muskogee, Okla.
